MARKETING BULLETIN

Date: January 13th, 2022

From: Tom Tillman, Director of Marketing

Subject: CUS600M /SF (single AC fuse) option removal

TDK-Lambda is removing the single AC fuse (/SF) option from the CUS600M series of AC/DC power supplies. Only the standard dual AC fuse models will be offered, which is acceptable for all applications where the end equipment is not hard wired to a circuit breaker panel.

No units with the /SF suffix have been shipped or are on order at this time.

If you have any questions on this, please contact TDK-Lambda Americas.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Tillman", enclosed in a simple oval scribble.

Tom Tillman
Director of Marketing
